40 YEARS OF PYRANHA

After 40 years of research and development, award winning designs, world-class expeditions, supporting top class boaters and expanding to be Europe's largest specialist manufacturer of canoes and kayaks, we still design and build all our boats in Britain. We do not know where our kayaks will be paddled so they are all built to the same high standard - to be pushed to the limit by our world class team of paddlers on the world's toughest rivers in the Himalayas, Rockies and Andes.

We are still primarily run by kayakers and so are committed to being on the leading edge of kayak design and make constant improvements to our whole production process to support this.

From kids to champions, we want everyone to enjoy the world's biggest water sport having as much fun out there as we do. Whether that's just ripping up your local play spot, exploring a remote creek or just messing about on the river.

We always have and always will be

Enthusiasts! Enthusiasts!

Developing the most technologically advanced materials, using the industry leading processing methods and most detailed quality control systems means we can produce truly world class kayaks.

PLASTICS

Making significant developments every year and working at the forefront of polymer technologies means that the most up to date polymer alloy is always used in the production of your kayak. The polymer alloy creates a balance between impact resistance, allowing bounce, shock absorbency and stiffness to create a safety cage around you and give the best hull performance.

Additives are used to help knit these polymers together, give UV and weather protection, prevent colour fade and protect the plastic during processing and throughout the life of the kayak. This means that your Pyranha Kayak will stay stronger and looking good for longer.

PROCESSING AND PRODUCTION

Our production facility including custom built more energy efficient ovens are the most advanced in the industry allowing us to truly get the best performance out of the plastics we use.

First in the industry to develop the computer controlled moulding process, Pyranha have continued to evolve the roto moulding process since 1983. We have been producing variable thickness kayak shells for 26 years optimising performance and weight and maximising durability and safety.

TESTING AND QUALITY CONTROL

Keeping high standards of quality is a top priority at Pyranha and every effort is made to ensure each boat that leaves the factory is tough enough to be used in the harshest conditions. Since 1995 every plastic development and new colour has been independently tested for impact and toughness and the quality control process exists throughout the whole manufacturing process.

ENVIRONMENT

We have been industry leaders in energy efficiency for many years and our new factory has given a 25% reduction in gas usage due to the best heat retention systems and lowest energy utilisation per kayak, making us the most progressive roto moulders in the industry.

We've been re-granulating and recycling our waste polyethylene since the mid 90s - way before most companies even thought about their environmental impact.

We recycle all waste polyethylene from both roto moulding and vacuum forming and also recycle all waste cardboard, paper and plastics.

We actually use some of our seat and backrest supplier's foam waste from making 'body amour' (rugby and football) to package the ends of our Pyranha kayaks.

PYRANHA OUTFITTING

The outfitting in your kayak is vital to your comfort, safety and overall performance on the water. Our outfitting systems have been developed over the last 40 years and incorporate the adjustability and security you demand from a white water kayak. Our Connect 30 outfitting coupled with the variable thickness hull structure of the kayaks shell create a safety cage around you.

CONNECT 30 OUTFITTING

Connect 30 outfitting gives you all the adjustment that you will ever need to quickly get your kayak set up for your individual style of paddling and body size. This makes sure that you can maximise the performance ability of the kayak without compromising your comfort. More performance + more comfort = more time on the water, so you're a winner! Your new Pyranha boat will also come with an extensive instructional manual too.

1. Adjustable padded thigh grips
2. Adjustable padded seat
3. Grab handles and security bars - tested to the highest standard
4. Ratchet adjustment backband
5. Adjustable hip pads
6. CAD optimised internal fittings

CLUB OUTFITTING

The club range is made for a wide range of uses. From entry level paddling to whitewater, this outfitting is perfect for clubs, schools and rental fleets.

1. Adjustable backrest
2. Adjustable twist-lock footrest
3. Etha buoyancy foams

COLOUR OPTIONS

Bren Orton, lining up for the entry move on his final ride.

Initiating a Phoenix Monkey.

Half way through a huge loop in the medium Molan.

“

The coolest thing about the Molan for me is that I'm not trying the same old tricks that I have done before. I am landing new ones. It has made the tricks that I could sometimes do easy and others possible. The width of the boat makes going from edge to edge very easy, which is essential for every trick. Plenty of volume providing huge pop in a hole, and a nice short but forgiving stern.

Dave Fusilli
Team Pyranha US

”

PYRANHA MOLAN

Developed closely with Team Pyranha paddlers, the Molan is seriously refined. It's THE dynamic park 'n' play machine for those looking to go big, high and fast!

The Molan is a user-friendly, spin happy playboat capable of really fast rotation, perfect for paddlers looking to throw combo moves together. Whether you're after the highest competition score or just want to nail new tricks, you'll soon be ripping up the scene like you've never done before!

KEY FEATURES

Shell design

- Smooth curves allow you to initiate moves and slice through the water without any resistance.

Volume in bow and stern

- Volume where you need it to boost pop while making setting up for moves easy.

Ergonomics

- Increased knee connection with the kayak ensures that no power is lost when pulling moves. Foot and knee room maximised to increase comfort without reducing performance.

2 way rails

- Forgiving on the upstream edge but once engaged provide grip and control for pulling the biggest moves on the water.

The Varun hitches a ride to the Snake River, Wyoming.

Pyranha's designer, Rich Taylor, out in the Varun for the first time.

Flatwater, cartwheeling tastic.

The most fun I've had on the river in a long time.

ff

The excellent acceleration and speed made this one of the most agile boats I've paddled in a long time. It had me looking for tight new lines on the local runs and made nailing them really easy. The boat was so much fun I found myself opting out of creek runs to go playboating for a change.

Ryan Bayes
Fraser Valley Whitewater.

ff

PYRANHA VARUN

PLAY THE RIVER. Run your home rapids, stop to surf, throw some ends then glide down, huck a drop, go back to the top to do it again.

The Varun has it all, forgiving edges, speed and maximum playability to give any white water enthusiast an awesome time on the river. Slicey ends allow you to initiate all the classic vertical moves plus it has enough speed to run the river in style.

KEY FEATURES

Length

- Surf the smaller river features and run rapids with confidence and style.

Width

- Stable and forgiving for beginners to white water.

Rocker

- Gives a great compromise between speed and lift to initiate moves.

Slicey ends

- Easy to squirt on eddy lines and initiate vertical moves.

2 way rails

- Born from the Molan, refined and coupled with a new side wall profile to give a forgiving ride with edges that allow move initiation and release.

Low back deck and cockpit lip

- Easy to learn to roll in or just get back the right way up!

Curved angles

- Back hull and wall angles are shallow to make for a forgiving ride.

Prototyping the Loki
on the Sun Kosi.

A classic kayak for
a classic river.

A real soul boat.

PYRANHA LOKI

With DNA flowing from Molan and Varun, the volume has been taken out of the deck, and the ends lengthened creating a long and slicey playboat that will surf, pirouette and wave wheel and allow you to run the river in style. Designed to revive the classic moves that we learned when we played the river the first time.

KEY FEATURES

Length

- Retains speed and slices through features on down river missions.

Low volume slicey ends

- For pivots and squirts in eddies and all types of vert moves.

Rocker

- Smooth and forgiving for sweet surfing sessions.

Side wall and 2 way rails

- Forgiving on the upstream edge but once engaged provide grip and control for carving on the wave.

Low back deck and cockpit lip

- Super easy to roll.

4 in Upper Bavaria
on day 1.

Then over to Switzerland
for 3 more the next day.

“

If you're the kind of person that doesn't like giving up speed to paddle a playboat, the Z.One will rock your world. I loved the way it carved and carried speed without having to pay the high price of edginess for paddling success.

Wayne Dickert
Paddling School Director,
Nantahala Outdoor Centre.

”

PYRANHA Z.ONE

The Z.One has proven itself to be a great all rounder since being launched. A descendent of the legendary InaZone, the Z.One has newly developed features that have been modernised for today's paddling styles.

Aspiring kayakers will benefit from the Z.Ones stability and manoeuvrability when surfing waves and river features. Whilst those returning from a few years away from paddling will find a kayak that feels familiar enough to engage with and get back into the sport.

KEY FEATURES

Lifted knee position

- Gives more efficient paddling strokes.

Raised bow rocker

- Extra lift over boils and eddy lines.

Edges

- Softened edges with low back cockpit and smoother hull cross-section increase ease of rolling.

Re-profiled rear hull and gunwales

- For improved control and surfing.

Connect 30 outfitting

- For adjustable comfort and control.

Andy England sets out to determine the significance of New Zealand's West Coast rivers.

I'm working with the department of conservation, collecting as much data as possible while out on the river.

This work will lead to better decisions being made about hydro developments and access limitations which affect kayakers.

“

I'm so impressed by how solid it is and how you can throw it around. Big loops for sure!

Todd Anderson
Team Pyranha.

”

PYRANHA AMMO

The Ammo is a boat with many uses. Some will play in it, some will run tight lines in it and some will tackle new, bigger water in it! After positive feedback from paddlers and the team, the Ammo has an upgraded internal pillar, great for use on the harder stuff and ideal for those long walk-ins, this ups the ante on the other 'all-round' kayaks out there.

Whatever you use it for, its short length, tight carving rails and plentiful volume will provide a super-responsive river runner that'll boof and run lines you thought you'd never make!

KEY FEATURES

Aggressive rocker

- Hit boofs with ease.

Short planing hull with carving rails

- Snappy switching from edge to edge.

Progressive high volume distribution

- Provides plenty of predictability in rapids.

Connect 30 outfitting

- For adjustable comfort and control.

Amazing creeking on the Ehe-Gol
ending with this 16m fall!

A superb platform for white water paddlers to progress their skills in. Fast, stable, reliable, and plenty of agility to hit those essential lines. Recreational paddlers will love this comfy down-river boat.

Nigel 'Wilf' Wilford
Level 5 Kayak Coach at CoachH2O

PYRANHA KARNALI

A truly forgiving, high volume river runner that has such a predictable ride it will keep you inspired to get back out on the water and progress from your very first days, long into your paddling life.

The Karnali is a winner when choosing to head on your first missions abroad. A remarkably stable hull, soft, round edge profile and generous rocker put your mind at ease and allow you to concentrate on the river ahead rather than what's happening underneath you.

KEY FEATURES

High volume hull with soft rounded edges

- For a forgiving and predictable ride.

Smooth hull profile

- Soft edges increase ease of rolling.

Large rocker and V shaped deck

- Give increased lift and controlled resurfacing in big volume water.

Connect 30 outfitting

”

PYRANHA BURN

The weapon of choice for many of the world's greatest paddlers. Subtle performance enhancing modifications make the Burn exactly what you need for having pinpoint accuracy and boofing down rivers like a Pro. Whether you're eddy hopping down remote gorges in distant locations or just want to Burn down your local run, there's more than one reason why this design is established as THE benchmark creek kayak.

KEY FEATURES

Front rocker

- Raised and re-profiled giving more control for boofs and drops without losing speed. It's still aggressive and it's still fun!

More V

- The front deck sheds water better, gives improved directional control and the tweaked rear deck V gives paddlers more predictability over drops or in holes.

Carving rails

- For precision and predictability for must make eddies and for snappy turns.

Paddler clearance

- Knee area and cockpit have been lowered to improve paddler to kayak contact, reaching for strokes and to make rolling easier.

Connect 30 Outfitting

- For adjustable comfort and control.

SUGGESTED ACCESSORIES

PYRANHA ACRO-BAT 270 & 275

Two of our most comfortable kayaks for long days out on the water. Both of the Acrobats are fast, manoeuvrable, easy to paddle and will leave the other kayaks standing. A bonus if you need to sprint to the rescue whilst instructing.

Great fun to surf, paddle on moderate whitewater or cruise around a lake, either of the Acro series can be enjoyed by any level of paddler.

KEY FEATURES

Traditional displacement hull

- Gives the ability to eat up the miles on longer trips and also excel in the ocean surf where it's fast and gives great control.

Large keyhole cockpit

- Makes it easy for entry and exit. There's lots of space for comfort and inspiring confidence.

Two choices of outfitting

- **Rapid:** Best for paddlers with advancing skills who don't need full on Connect 30 outfitting. Adjustable backrest, fully padded thigh grips, full plate footrest and mini cell buoyancy foams.
- **Club:** Features easily adjustable sliding footrest that make this kayak best for clubs, schools and rental fleets looking for value and performance. Adjustable backrest, footrest and etha buoyancy foams.

PYRANHA G:3

LENGTH	WIDTH	VOLUME	WEIGHT	PADDLER WEIGHT RANGE
278cm / 9' 1"	67cm / 26 1/2"	302lts / 80gal	20kgs / 44lbs	60kgs / 132lbs — 127kgs / 279lbs

SUGGESTED ACCESSORIES

PYRANHA G:3

The G3 is the perfect combination of old school and new school. The hull shape makes for a long, fast and easy to paddle boat that'll track in a straight line rather than wandering around. And because the hull's flat, you can still surf, spin and carve when you need to.

With comfortable, durable fittings, plenty of foot room and a generous carrying capacity, it's an ideal choice for long river trips, river leading or instructing.

KEY FEATURES

Modern flat hull design

- Incredibly stable, with a raised double rail to aid carving, rapid acceleration and directional control.

Tapered ends

- Allowing maximum manoeuvrability over a greater paddler & load range.

Two choices of outfitting

- **Rapid:** Best for paddlers with advancing skills who don't need full on Connect 30 outfitting. Adjustable backrest, fully padded thigh grips, full plate footrest and mini cell buoyancy foams.
- **Club:** Features easily adjustable sliding footrest that make this kayak best for clubs, schools and rental fleets looking for value and performance. Adjustable backrest, footrest and etha buoyancy foams.
